Choose your coins wisely!

SECURE YOUR TRADING ENVIRONMENT

It is important to secure your environment (i.e., laptop, smartphone) when trading cryptos. First, ensure that you implement a strong password using capital letters, numbers, and special characters. Use at least a 12-character password. Securing your environment will keep hackers at bay. Second, leverage a Virtual Private Network (VPN) which will run you about \$4.95 to \$12.95 a month. This will provide a point to point across the Internet. Finally, always use the 2-factor authentication to secure your information. This 2-factor authentication can be a code sent to your phone or using an authenticator.

Security should always be top of mind!

RIPPLE (XRP)

The price of Ripple (XRP) was up slightly this week currently trading at \$.77 USD. The lawsuit continues on and on and on.... We will see if there is a decision by April like many pundits believe.
